

Always Connected

Anokiwave and Qorvo bring innovation and scale to SATCOM applications. Our system level support and broad portfolio of products are connecting the world through space.

Ground Applications

Flat Panel Arrays Ku-Band

Rx: 10.7 to 12.75 GHz; Tx: 13.75 to 14.5 GHz

Ku-Band Quad Beamformer ICs AWMF-0146, AWMF-0147

Quad 4x2 Tx and Rx highly integrated ICs simplifying active antenna design. Recommended Rx Gain Stage: CMD264P3 Recommended Tx Driver: CMD264P3

Ka-Band

Rx: 17.7 to 21.2 GHz: Tx: 27.5 to 31.0 GHz

Ka-Band Quad Beamformer ICs AWMF-0197: AWMF-0198

Quad 4x2 Tx and Rx highly integrated ICs simplifying active antenna design. Recommended Rx Gain Stage: QPA2626 Recommended Tx Driver: QPA2628

SATCOM Terminals

Ku-Band

SMT package

Rx: 10.7 to 12.75 GHz; Tx: 13.75 to 14.5 GHz

8, 15, or 25 W GaN Tx Power Amplifiers

Ultra-Low Noise Rx Amplifier CMD320C3

QPA0015, QPA0016, QPA0017

Market leading NF=1.07 dB, 18 dB gain with no external DC blocks or RF matching required. Low power dissipation.

Ka-Band

Rx: 17.7 to 21.2 GHz; Tx: 27.5 to 31.0 GHz 25 W GaN Tx Power Amplifier **QPA2212D**

GaAs Rx Low Noise Amplifier CMD298C4

Market leading NF=1.07 dB, 18 dB gain with no external DC blocks or RF matching required. Low power dissipation.

QORVO

MD320C3

QOCVO

Space Applications

Space Payload

QPA1006D, QPA1009D

Ku-Band Rx: 13.75 to 14.5 GHz: Tx: 10.7 to 12.75 GHz

17.5 or 35 W GaN Tx Power Amplifiers

QORVO QOOVO

GaAs Rx Low Noise Amplifier QPA2735

Market leading NF=1.3 dB, 25.5 dB gain with no external DC blocks or RF matching required.

Ka-Band Rx: 27.5 to 31.0 GHz: Tx: 17.7 to 21.2 GHz

20 or 30 W GaN Tx Power Amplifiers QPA1721D, QPA1724

GaAs Rx Low Noise Amplifier **QPA2628**

Market leading NF=1.6 dB, 23 dB gain with no external DC blocks or RF matching required.

our complete portfolio for SATCOM
